***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2,4-7,9-13,15-18,20-24,26-29,31-35,37-45,47-48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kerker et al (3744745).

Kerker et al (3744745) shows a leading edge flap on the wing in the area of the engine the chine 24 is mounted on the outboard side of thenacelle, therefore it has a "mounting base". Since the chine is sized to be effective in a particular position on the engine to form a vortex over the wing than it is sized as functionally claimed in the application.

Kerker et al (3744745) stated that prevents separation at high angles of attack when the flaps are used which not only increases lift but since separation is avoided this will also have a lower drag when there is no separation.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3,8,14,19,25,30,36, 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kerker et al (3744745).

The use modeling or empirical testing are well known and obvious procedures and It would have been obvious to one having ordinary skill in the art at the time the invention was made to so design the chines of the above references.

1. Applicant's arguments with respect to claim1-48 have been considered but are moot in view of the new ground(s) of rejection.
